

E. Long-Range Plan for Bicycle Facilities

The Long-Range Plan for Chandler's bicycle facilities envisions a three-tiered network of arterial street bike lanes and wide curb lanes, collector street bike lanes and off-road trails along canals and utility easements. It will create a system that enables bicyclists of all ages and levels of proficiency to use bicycles for transportation and recreation conveniently, comfortably and safely.

Arterial street bike facilities

For experienced, confident and proficient bicyclists, the arterial streets will offer either five-foot bike lanes or, in some cases, 14- to 15-foot outside curb lanes in the roadway. These will be prominently signed with either "Bike Route" or "Share The Road" signs. They will connect directly with bicycle facilities in adjoining communities.
